Emergency Medical Services (EMS) — An Overview

## **Health Insurance Incentives**

## - A Needed Change

by G. Kenneth Johnson, M.D. Ogden, Utah

Critics of the current medical system often point to a lack of preventive approach and our emphasis on acute illness treatment and hospitalization treatment as major points of weakness. However, many of the sources of illness in our contemporary world do not allow a medical or surgical approach for successful treatment and, therefore, require repeated medical private health insurance companies with NHI or some other program, it is probable that federal planners will seek to identify and quantitate the major risk factors in our society. It is almost as likely that some of them will then set goals to alter those risk factors. Thus, attempt at social reform by federal mandate is possible. Government has the immediate attention of the com-
